## TRANSPORTABLE BUILDINGS WA

▾ Dongas   ▾ Granny Flats   ▾ Fully Customised To Your Requirements

Providing affordable solutions

Whatever your accommodation requirements, we can offer you an affordable solution with fully built, dongas, granny flats and cabins. Specialising in transportable building services, we can supply and install transportable structures for your home or workplace. Our products can be fully customised internally to suit your requirements.

Mobile Camp Kitchen 6m x 3m

Mobile Camp Kitchen interior 6m x 3m

Our transportable Dongas are quality built by experienced tradesmen and delivered on-site complete. We can deliver our Dongas 100% complete to your specific requirements.

Our latest project has been a custom built mobile camp kitchen, built to withstand outback Australian conditions and to serve as mobile kitchen during the muster season. The pictured camp kitchen has been kitted out with solar panels, a 12 volt battery management system with 12volt and 240 volt lighting, a water tank, 2 full length awnings, storage box and a good sized workspace for preparing meals. The kitchen has double sinks, an oven, full sized fridge, heaps of bench space and the luxury of an air-conditioning unit. The trailer has been custom built and has ample space for the storage of swags and other equipment.

Hunter Transportable Buildings is an Australian owned company recognised as a trusted builder with extensive experience in the building industry. We can deliver quality transportable homes and cabins throughout Australia.
